

G'Day, Mate! (Leather Mesh Premium USA)

Dingo! *Not another Aussie invention.* Australia is famous world wide for hats, like yanks are well known for big cars and apple pie. ***Actually Walkabout helped move this design concept to the USA!***

Now ***made in USA***, from Premium Leather, these are our best mesh hats ever. You can, if you like, spray the hat with Scotch Guard to protect against stains. Bad marks can be removed by rubbing with a fine 100 grit sandpaper. We have already treated your hat for you so don't worry.

**COOL MESH.** The more you wear it the better it will fit and form to you. Thinner than Canvas, our Cool Mesh hats are cooler, more durable and softer to wear. They can be washed in cool water with a sponge, with a small amount of mild soap every now and then, to remove the salt (sweat) and prevent stains later on. (Best under the inner sweat band)

**FIT on all hats.** Hat sizer included in the box – Attach via Velcro as needed for a better fit. Or Glue in with glue gun as needed. If a bit snug, simply ***stretch over your knee.*** Tug with hand under the crown (inner stitching). It won't break.

Hats give, stretch and shrink with heat and wet. In other words – ***wear it a lot – it will fit better.*** If you get it wet, and it dries too fast (next to the campfire), it may be a bit tight the next time. Do this on purpose if you want to shrink a hat. I recommend fishing in the rain, and letting it **dry on your head.** If you want to shrink, dry it on the dash on the ride home with defrost on high.

***If a hat shrinks a bit much -a stretch over the knee will bring it back to size.*** All of this is too confusing? ***Do nothing but wear it a lot – the more you use it, the better it will fit, seal up, and become an old friend for years to come.***

Enjoy your Walkabout Hat.
